

Print this page on a thick paper (like cartridge sheet) and follow instructions

## Woodpecker

Cut the woodpecker card on the dotted line. Fold it in the middle and stick the whole card with glue with a small piece of straw inside the centre fold.

Now put a thread or large rubber band through the straw and hold it tight.

This woodpecker will move slowly on the thread in the woodpecker action as if it is cutting the wood.

This happens due to friction between thread and straw.
